

GOAL: GIVE BACK!

At ADSF, our goal is to create an active networking of African diaspora scientists independently from their home countries.

At ADSF, we are looking for African Diaspora Scientists, that's it!

Scientists in the field of biological sciences, chemistry, computer sciences, Engineering, Mathematics, Medical sciences and Physics are highly desired to join ADSF.

We aim to contribute to African development using science and new technologies approaches. It is a logic way to give back to our first home continent which initiate our education.

Join us today as ADSF member and learn more about our upcoming activities!
